How Clocks Work

Fill in the circle by the correct answer.

How Clocks Work

People use clocks to keep track of time. There are two main kinds of clocks. The first kind shows numbers in a circle. It is called an analog clock. An analog clock has a face. The face has 12 numbers. The clock has two hands. A short hand points to the hours. A long hand points to the minutes.

The second kind of clock has only digits, or numbers. A digital clock has electronic numbers. A digital clock does not have a face. It does not have hands. The numbers on a digital clock show the time.

Clock Talk

Fill in the circle by the correct answer.

Clock Talk

People use clocks to keep track of time. You can use time to talk about the past. You can also use time to plan for the future. People use the word o'clock when they talk about time. To tell when you wake up today, you can say, "I woke up at seven o'clock." To make plans for tomorrow, you can say, "Meet me at the library at four o'clock."

There are two main kinds of clocks. An analog clock has a face with 12 numbers in a circle. The clock has two hands. The short hand points to the hours, and the long hand points to the minutes. The second kind of clock shows digits, or numbers. A digital clock does not have a face or hands. It has electronic numbers that show the time.

Level 3

Words to Know list, Reading Selection, and Reading Comprehension questions

Telling Time

Fill in the circle by the correct answer.

Telling Time

If you need to know what time it is, you can look at a clock. Each day has 24 hours, but most clocks only show 12 hours. A day is divided into two sets of 12 hours. We use a.m. for the morning and late night hours. We use p.m. for the afternoon and evening hours.

Each hour in a day has 60 minutes, and each minute has 60 seconds. An analog clock shows 12 numbers on its face. There are two hands on this kind of clock. One hand points to the hours, and the other points to the minutes. You can tell the time by saying, "It's ten minutes after six." You can also say, "It's six ten."

Most computers and cellphones show time with digital clocks. Digital clocks do not have hands or faces. They show the time with electronic numbers and a.m. or p.m.

Assemble the Unit

Reproduce and distribute one copy for each student:

- Visual Literacy page: Kinds of Clocks, page 111
- Level 1, 2, or 3 Reading Selection and Reading Comprehension page and the corresponding Words to Know list
- Graphic Organizer of your choosing, provided on pages 180–186
- Writing Form: Time, page 112

Introduce the Topic

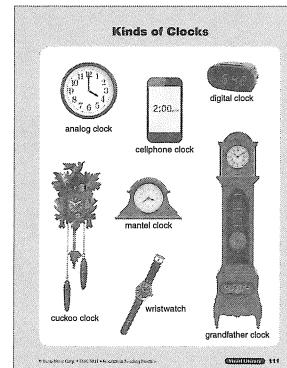

Begin by pointing out your classroom clock and telling its current time. Then review each of the clocks and their names. Discuss with students which types of clocks they use the most in their everyday lives.

Read and Respond

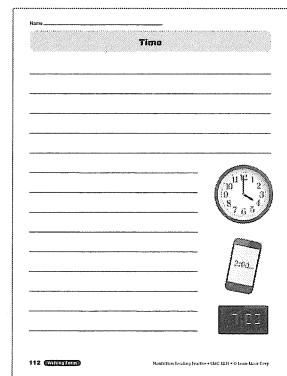

Form leveled groups and review the Words to Know lists with each group of students. Instruct each group to read their selection individually, in pairs, or as a group. Have students complete the Reading Comprehension page for their selection.

Write About the Topic

Read aloud the leveled writing prompt for each group. Tell students to use the Graphic Organizer to plan their writing. Direct students to use their Writing Form to respond to their prompt.

How Clocks Work

People use clocks to keep track of time. There are two main kinds of clocks. The first kind shows numbers in a circle. It is called an analog clock. An analog clock has a face. The face has 12 numbers. The clock has two hands. A short hand points to the hours. A long hand points to the minutes.

The second kind of clock has only digits, or numbers. A digital clock has electronic numbers. A digital clock does not have a face. It does not have hands. The numbers on a digital clock show the time.

How Clocks Work

Fill in the circle by the correct answer. Then answer the questions.

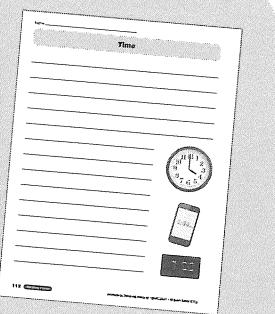

1. People can use _____ to keep track of time.
Ⓐ an hour
Ⓑ a face
Ⓒ a clock
2. An analog clock uses _____ to show hours.
Ⓐ a small circle
Ⓑ a short hand
Ⓒ an electronic number
3. How are analog clocks and digital clocks alike?

-
-
-
4. What is the main idea of the text?

Clock Talk

Fill in the circle by the correct answer. Then answer the questions.

1. To talk about time, people use the word _____.
Ⓐ track
Ⓑ library
Ⓒ o'clock

2. You can use time to tell people _____.
Ⓐ when to meet you somewhere
Ⓑ what day of the week it is
Ⓒ which kind of clock to use

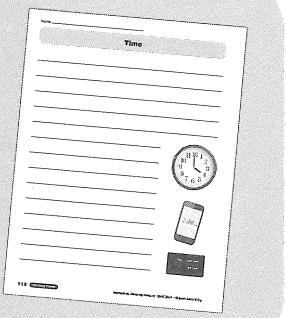

3. What does each hand on an analog clock point to?

4. How does a digital clock work?

Write About the Topic

Use the Writing Form to write about what you read.

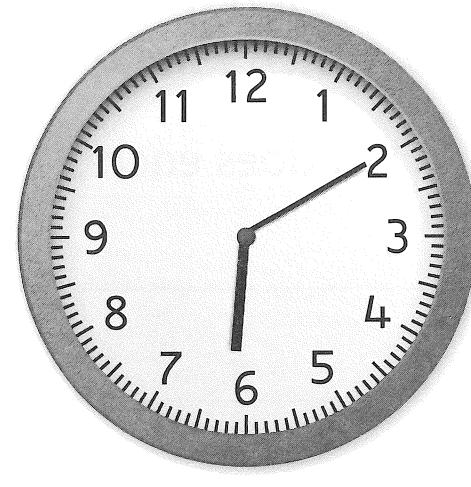

Write to tell how analog clocks and digital clocks are different.

Telling Time

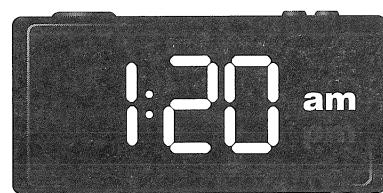

If you need to know what time it is, you can look at a clock. Each day has 24 hours, but most clocks only show 12 hours. A day is divided into two sets of 12 hours. We use **a.m.** for the morning and late night hours. We use **p.m.** for the afternoon and evening hours.

Each hour in a day has 60 minutes, and each minute has 60 seconds. An analog clock shows 12 numbers on its face. There are two hands on this kind of clock. One hand points to the hours, and the other points to the minutes. You can tell the time by saying, “It’s ten minutes after six.” You can also say, “It’s six ten.”

analog clock

Most computers and cellphones show time with digital clocks. Digital clocks do not have hands or faces. They show the time with electronic numbers and **a.m.** or **p.m.**
