Words to Know list, Reading Selection, and Reading Comprehension questions

Paying with Coins

There are many different kinds of money. Some money is made from metal. We call this kind of money coins. Coin money comes in different sizes. Each coin has a different value. This means it is worth a different amount of money.

A penny is worth one cent.
A nickel is worth five cents.
A dime is worth ten cents.
A quarter is worth twenty-five cents.

You can use money to buy things you want or need. If you want to buy a toy, you can pay for it with coins. Add your coins together until you have enough money.

The pinwheel costs seventy-seven cents. You can add three quarters and two pennies together. Now you have enough money to buy the pinwheel!

Using Paper Money

People can use different kinds of money to buy what they want or need. One kind of money is made from paper. We call this kind of money dollars or dollar bills. Dollar bills are the same size, but they have different values. Each bill is worth a different amount of money.

A one-dollar bill is worth \$1.
A five-dollar bill is worth \$5.
A ten-dollar bill is worth \$10.
A twenty-dollar bill is worth \$20.

You can buy something you want with dollars. Add or subtract the bills to come up with the right amount of money. You might not have enough money to buy what you want right now. Save your dollars. Keep adding bills to your savings until you have enough. Then you can buy what you want.

Spending or Saving

Money is made in many different forms. Coins are made from metal and dollars are made from paper. Coins and paper money are called cash. People also use money electronically. First, a person must deposit money into a bank account. Then the person writes a check or uses a debit card. This tells the bank electronically to pay money out of the account.

The cost of an object is how much money you need to buy that object. The cost of the soccer ball is fifteen dollars and fifty cents. The woman can buy the soccer ball with dollars and coins. She can also pay electronically. Or, if the woman doesn't have enough money to buy the soccer ball today, she can save her money. Then she can buy the ball when she has saved enough money to pay for it.

Assemble the Unit

Reproduce and distribute one copy for each student:

- Visual Literacy page: Kinds of Money, page 101
- Level 1, 2, or 3 Reading Selection and Reading Comprehension page and the corresponding Words to Know list
- Graphic Organizer of your choosing, provided on pages 180–186
- Writing Form: Money, page 102

Introduce the Topic

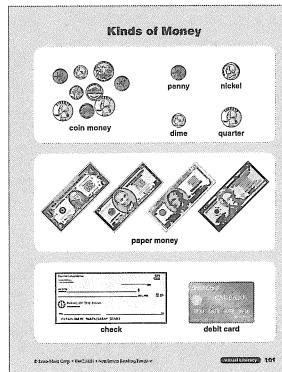

Explain that people use money to pay for things. Review each type of money with students. Ask them to share which type of money they are most familiar with.

Read and Respond

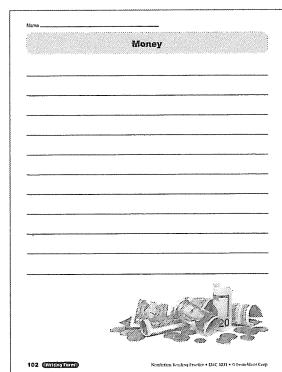

Form leveled groups and review the Words to Know lists with each group of students. Instruct each group to read their selection individually, in pairs, or as a group. Have students complete the Reading Comprehension page for their selection.

Write About the Topic

Read aloud the leveled writing prompt for each group. Tell students to use the Graphic Organizer to plan their writing. Direct students to use their Writing Form to respond to their prompt.

4. Write three facts about coins.

Write About the Topic

Use the Writing Form to write about what you read.

Explain what coins are and how they are used.

Using Paper Money

People can use different kinds of money to buy what they want or need. One kind of money is made from paper. We call this kind of money **dollars** or **dollar bills**. Dollar bills are the same size, but they have different values. Each bill is worth a different amount of money.

A one-dollar bill is worth \$1.

A five-dollar bill is worth \$5.

A ten-dollar bill is worth \$10.

A twenty-dollar bill is worth \$20.

You can buy something you want with dollars. Add or subtract the bills to come up with the right amount of money. You might not have enough money to buy what you want right now. Save your dollars. Keep adding bills to your savings until you have enough. Then you can buy what you want.

Using Paper Money

Fill in the circle by the correct answer. Then answer the questions.

1. Dollar bills are paper money that _____.
Ⓐ all have different values
Ⓑ are all worth five dollars
Ⓒ are made in different shapes

2. You can write ten dollars as _____.
Ⓐ \$1
Ⓑ \$5
Ⓒ \$10

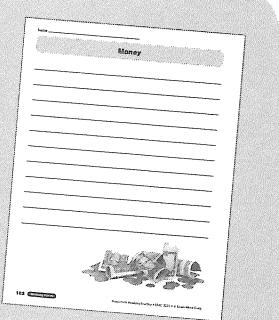

3. What do people use dollars for?

4. Write three facts about dollar bills.

Write About the Topic

Use the Writing Form to write about what you read.

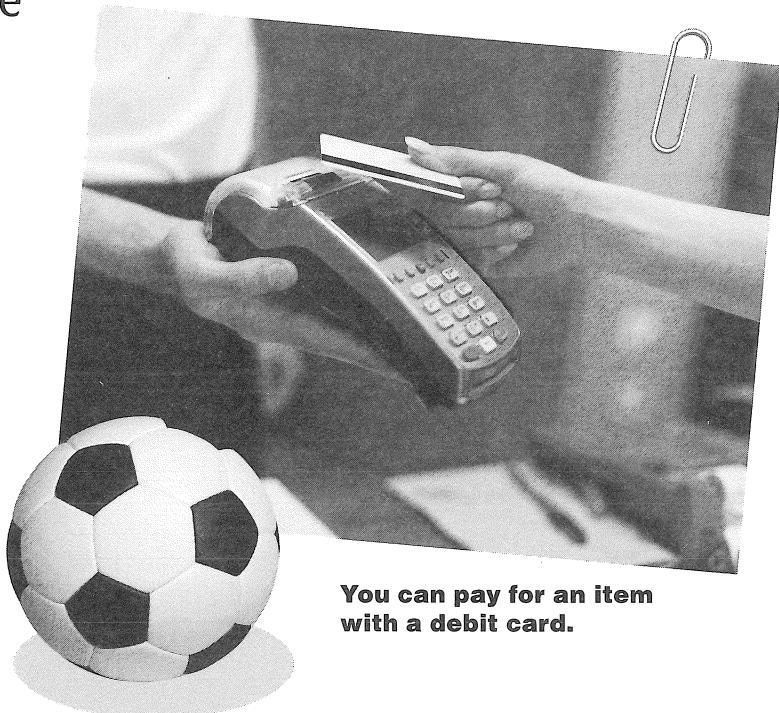

Explain what dollar bills are and how they are used.

Spending or Saving

Money is made in many different forms. Coins are made from metal, and dollars are made from paper. Coins and paper money are called **cash**. People also use money electronically. First, a person must deposit money into a bank account. Then the person writes a check or uses a debit card. This tells the bank electronically to pay money out of the account.

The **cost** of an object is how much money you need to buy that object. The cost of the soccer ball is fifteen dollars and fifty cents. The woman can buy the soccer ball with dollars and coins. She can also pay electronically. Or, if the woman doesn't have enough money to buy the soccer ball today, she can save her money. Then she can buy the ball when she has saved enough money to pay for it.

You can pay for an item with a debit card.
